

Environmental Projects

Pharmacare PLC has invested in multiple environmental projects in order to meet the updated legislative and regulatory environmental requirements as part of the environmental responsibility in the communities in which Pharmacare operates. Those environmental projects include, but are not limited to the following:

- Establishing of a public garden, planted with olive trees, to avoid accumulation of garbage and dust.
- Collecting the generated dust from manufacturing areas through special "Dust Collecting" system. The collected dust is then disposed of in an appropriate environmental manner.
- Installing Special insulators in the manufacturing areas for reducing the external noise so that the generally accepted noise levels are not exceeded.
- Treating the Effluent waste water biologically using a specialized system in order to get rid of the organic materials before disposing water into the waste water network.
- Providing the working areas with all the needed safety apparels and equipments in order to ensure a safe operating environment for all the employees.
- Reducing the consumption of the major energy resources such as the electricity through installing of a motion detector light system that is turned off automatically when the operating areas are not in use.

 Pharmacare PLC

A word from the CEO

As the CEO of Pharmacare PLC, I am proud to emphasize the basic principles that guided our work from our humble beginnings in 1986 to the present.

To us Pharmacare is a project with a mission and a heart. We were not deterred by the hostile economic and political climate of the 1980's. We insisted on investing in our homeland and preferred it to other, more lucrative locations, in and outside our region. We did this because we care. We care for our future here in Palestine; we care for our people's health and well-being; we care for our national economy; we care for the local investors; and we care for our image locally and internationally. Given all of this, we care for our environment.

To emphasize our commitment to the environment and to help us spread this commitment internally at Pharmacare as well as externally, we use the slogan "Earth is not a gift from our parents, it is a loan from our children".

Bassim Houry
CEO, Pharmacare PLC

Environmental Principles

Throughout its businesses, Pharmacare PLC will meet or improve upon legislative and regulatory environmental requirements. We aim to contain the environmental impact of our activities to levels acceptable with our environmental principles.

In addition, we will strive to continue to be regarded as a good and trusted neighbour, demonstrating environmental care in the communities in which we operate.

Environmental Vision & Goals

To ensure our future growth continues to be environmentally driven, we have developed long-term visionary goals for each significant environmentally aspect that link value creation and environmental improvement.
