

Pharmacare Group

Established in 1985 by a group of Palestinian entrepreneurs led by the late Mr. Subhi Khoury Nasr, Pharmacare today is a leading pharmaceutical company in Palestine manufacturing and distributing medicines to people around the world.

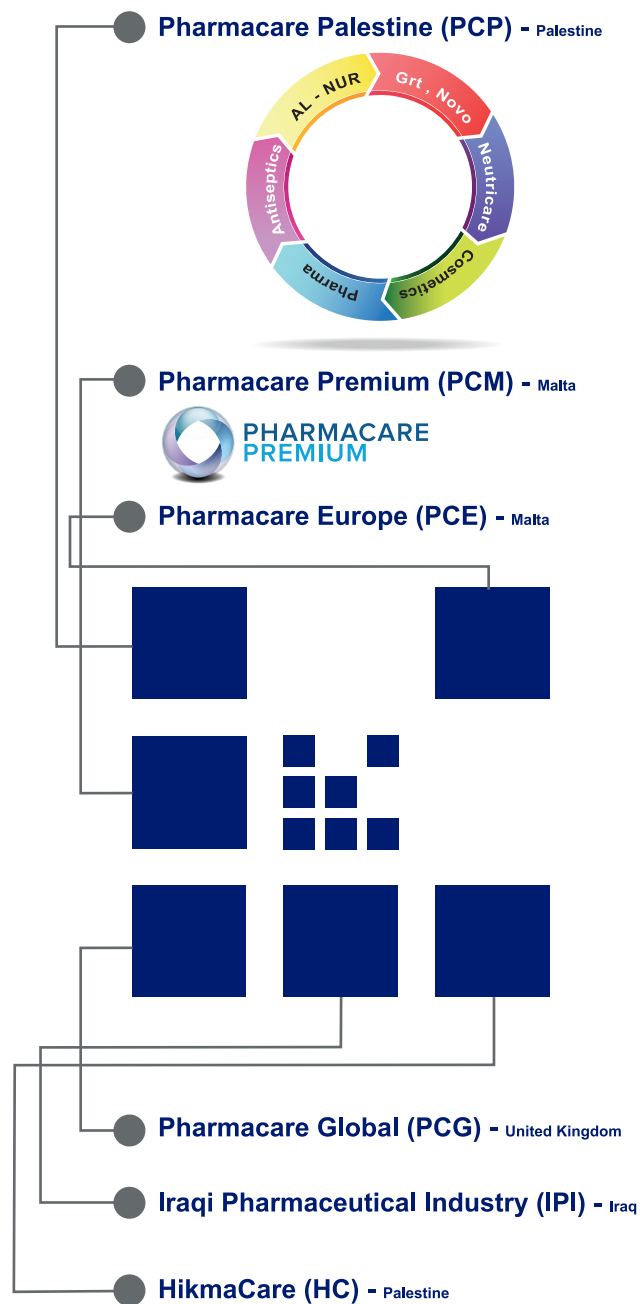

"Pharmacare is committed to fulfilling high expectations towards customers, the society and the environment by means of producing high quality pharmaceutical products at affordable prices".

We pride ourselves on providing quality products and we strive to preserve, sustain and improve "Quality of Life". We endeavour to establish a Euro-Med alliance in pharmaceuticals and to bolster a professional partnership with regulators, medicinal authorities and end-users.

The coming era marks the introduction of Pharmacare's expanded manufacturing facility estimated to onset in 2018. The facility comprises eight floors, three undergrounds and an interconnecting tunnel. €6.2 m have been expended, of which a €2.5 m long-term loan was, kindly, provided by AFD. This expansion is anticipated to double Pharmacare's production capacity and should trace a trademark in future documentations of the company's history.

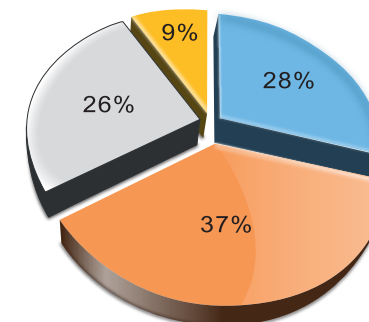

Introducing the Pharmacare Group

Pharmacare demonstrates strong presence within the local and European markets

Production Distribution over 2016

● Export ● West Bank ● Gaza ● Tenders
